

Patent Application Number: 09/742,178

In the Claims

1. (Currently Amended) A method of enabling scan to print ~~Scan to Print~~ services for a document ~~Document~~ reproduction ~~Reproduction~~ system ~~System~~ (DRS), comprising ~~the steps of:~~

creating a scan to print job template ~~specifying at least one recipient and at least one printing device, the job template defining job parameters of a print job including a recipient and a printing device;~~

storing said the created job template in an accessible pool service ~~accessible by at least one device;~~

selecting a job template from ~~said the~~ pool service;

scanning, using the document reproduction system, a document and converting the document into a digital document ~~placing at least one document on the DRS feeder to be scanned into the system;~~

performing operations, specified by the job parameters of the selected job template, upon the digital document to create a manipulated digital document; and

~~scanning said document for forwarding~~ the manipulated digital document to the said recipient's printing device specified by the selected ~~said created~~ job template.

2. (Currently Amended) The A method as in claim 1 wherein the selected ~~said scan to print~~ job template further comprises print quality options and delivery preferences.

3. (Currently Amended) The A method as in claim 1 wherein ~~the step of creating the creation of~~ job templates is restricted to a privileged user.

4. (Currently Amended) The A method as in claim 1 wherein ~~the step of creating the creation of~~ job templates comprises ~~the step of~~ selecting a pre-defined job template from a set of templates.

Claim 5 (Cancelled)

Patent Application Number: 09/742,178

6. (Currently Amended) The A method as in claim 1 wherein the selection of said step of selecting a job template includes selecting parameters that modify at least one DRS a document reproduction system control functions.

7. (Currently Amended) The A method as in claim 1 further comprising the step of combining parts of different scanned documents into a single output document forwarded to a printing device.
